

INDEX OF AUTHORS' NAMES.

ABSTRACTS. 1881.

A.

- Abel, F. A., colliery explosions, 948.
 Abel. See also Noble.
 Abney, W. de W., note on the spectrum of sodium, 957.
 — on the photographic method of mapping the least refrangible end of the solar spectrum, with a map of the solar spectrum from 7,600 to 10,750, 957.
 — spectrum of sodium, 862.
 Abney, W. de W., and R. Festing, influence of the molecular grouping in organic bodies on their absorption in the infra-red region of the spectrum, 487, 957.
 Adam. See Grimaux.
 Adams, F. D., analyses of the water of Assiniboine and Red Rivers, Canada, 562.
 Aitken, J., relations between dust, fog, and clouds, 970.
 Albert, E. and H., preparation of phosphates, 950.
 Albert, J., coloured photographs, 1178.
 Albert, H., and Siegfried, manuring cress with dicalcium phosphate on soil free from humus, 462.
 Albert, H., and R. Wagner, behaviour of phosphates in water charged with carbonic acid, 117.
 Alexejeff, W., diazo-compounds, 262.
 — heat phenomena of the solution of alcohols in water and of water in alcohols, 9.
 — liquid camphor, 438.
 — preparation of pure phenol, 723.
 Allary, E., analyses of marine algæ, 319.
 — purification of carbon bisulphide, 800.
 Allary, E., and J. Pellieux, extraction of potassium iodide from kelp, 319.
 Allary. See also Pellieux.
 Alldred, C. H., treatment of mineral and other substances containing small quantities of calcium phosphate, 665.
 Allen, A. H., isolation of strychnine, 1176.
 — notes on petroleum spirit and allied liquids, 651.
 — specific rotatory power of cane- and invert-sugar, 653.
 Allen, C. L., incandescence of cupric antimonate when heated strongly, 513.
 Allen, H. v., *Viburnum prunifolium*, 104.
 Allen, O. D., and W. J. Comstock, bastnasite and tysonite from Colorado, 364.
 Allert, R., derivatives of metachloronitrobenzene and orthochlorobenzene-sulphonic acid, 902.
 Allihn, F., conversion of starch into sugar by the action of dilute sulphuric acid at high temperatures, 149.
 — grape-sugar from starch, 770.
 Amagat, E. H., action of oxygen on mercury at the ordinary temperature, 1107.
 — compressibility of carbonic anhydride and of air under low pressures and at high temperatures, 1094.
 — compressibility of oxygen, 782.
 — dilatation and compressibility of gas under high pressures, 12.
 Ammon, G., permeability of soils to air, 302.
 Andoynaud, A., and B. Chauzit, permeation of water through the soil, 1071.
 André, strontium and barium oxychlorides, 979.
 Andreasch, R., carbamidacetosulphonic acid, 257.

- Andreasch, R., synthesis of methylparabanic and methylthioparabanic acids and of cholestrophane, 896.
- Andresen, M., thymoquinonedichlorimide, 590.
- Andrews, L. W., bromorthamidoparabenzenesulphonic acid, 174.
- bromorthonitrobenzenesulphonic acids, 174.
- Andrews. See also Hill.
- Angelbis, C., the picrites of Nassau, and the labradorite porphyries of Westphalia, 387.
- Anschütz, R., decomposition of citric acid by distillation, 35.
- Anschütz, R., and W. Petri, itaconic anhydride, 35.
- Anschütz. See also Kekulé.
- Antweiler. See Claisen.
- Antz, C., and E. Erlenmeyer, action of ammonium citrate on phosphates, 847.
- Arata, P. M., chemical examination of *Persea Lingue* and its tannin, 600.
- quebrachitannic acid, 1152.
- supposed identity of paytine and aspidospermine, 622.
- Armstrong, G. F., diurnal variation of carbonic anhydride in the air, 974.
- Armstrong, H. E., and W. A. Tilden, remarks on Kolbe's discovery of a new cymene in light rosin oils, 40.
- Arnold, A. E., note on a crystallised slag isomorphous with olivine, 1016.
- Arnold, C., Fehling's solution, 942.
- Arnold, J. O., estimation of chromium in iron and steel, 646.
- estimation of phosphorus in steel, 646.
- Arnold, L. B., effect of oxygen on the quality of butter, 1184.
- Aronstein, L., action of ethyl bromide on ethyl bromacetate, 576.
- conversion of normal into isopropyl bromide by heat, 567.
- Aronstein, L., and J. M. A. Kramps, action of methyl iodide on methyl iodacetate, 576.
- Arx, J. v., α - and β -naphthylene-phenylene oxides, 282.
- Arzruni, A., coquimbite, 397.
- Ashby, A., formulæ for calculating the quantity of water added to diluted spirit, 1182.
- Atkinson, R. W., diastase of Koji, 1059.
- Attwood, G., a contribution to S. American geology, 390.
- Aubin. See Muntz.
- Ayrton. See Perry.
- B.**
- Babcock, S. M., celestine from the Muschelkalk of Jühnde, near Göttingen, 524.
- Bachmeyer, W., tannic acid as alkalimetric indicator, 946.
- Badenhausen. See Danilewski.
- Bäteke. See Claus.
- Baeyer, A., preparation of skatole from indigo, 278.
- relation of cinnamic acid to the indigo group, 274.
- Baker, A. L., amount of water of crystallisation of hydrated nitrate of strontium, 509.
- analysis of a ferruginous mineral from Amhurst Co., Va., 554.
- artificial production of livingstonite, 517.
- Ballant, *Phytolacca dioica*, 1151.
- Balland, a cause of alteration of textile fabrics, 1185.
- Ballo, M., a new property of camphor, 438.
- isobutylallylmalonic acid, 415.
- oxidation-products of camphor, 438.
- Balsohn. See Friedel.
- Bamberger, E., guanylthiocarbamide and some guanylguanidines, 43.
- Bannow, A., an isomeric potassium cyanate, 144.
- Barbaglia, G. A., thiovaleraldehyde, 34.
- Barbaglia, G. A., and P. Gucci, action of chlorine on diisopropylketone, 34.
- action of heat on sodium hydrogen sulphite, 224.
- dry distillation of calcium isobutyrate, 35.
- Barbieri. See Schulze.
- Bardy, C., assay of wood-spirit for the preparation of methylated spirit, 1174.
- wood-spirit for making methylated spirit, 942.
- Barth, L., and J. Herzig, mesitylenesulphonic acid, 733.
- Barth, L., and M. Kretschy, picrotoxin, 286.
- Baudrimont, E., analysis of bismuth subnitrate, 196.
- Baudrowski, E., potassium propargylate, 239.
- Bauer, A., and M. Gröger, new acid of the $C_nH_{2n-4}O_6$ series, 894.
- Bauer, M., barsowite, 375.
- kjerulfin, 366.
- parallel junction of different varieties of epidote, 379.

- Baumert, G., lupinine, 831.
 Baumhauer, H., note on mica, especially zinnwaldite, 692.
 — perowskite, 398.
 Baumhauer, H., and E. Mallard, boracite, 397.
 Baumhauer, R., artificial calspar twins, 397.
 Baur, J., *Hydrangea arborescens*, 916.
 Baur. See also Meyer.
 Bayley, T., preparation of potassium hydrogen saccharate, 580.
 Béchamp, A., formation of chloroform from alcohol and bleaching powder, 566.
 — viscose, 1024.
 Béchamp, J., presence of alcohol in the animal tissues, 928.
 Becke, F., hypersthene from Bodenmais, 539.
 — twin formation and optical properties of chabasite, 398.
 Becker, A., optical rotatory power of asparagine and aspartic acid in different solvents, 801.
 Becker. See also Michaelis.
 Beckhusen, H., results of fattening calves with skimmed milk, 297.
 Beckurts, H., and R. Otto, action of heat and water on the halogen substituted acids of the $C_nH_{2n}O_2$ series, 574.
 Beckurts. See also Otto.
 Becquerel, H., specific magnetism of ozone, 340.
 Becquerel, E. and H., temperature of the soil under snow, 934.
 Bedall, K., and O. Fischer, hydroxyquinoline, 613.
 Beetz, W., elasticity and electric conductivity, 776.
 — the strict meaning of galvanic polarisation, 490.
 Behrend, R., action of sulphuryl chloride on dimethylamine, 716.
 Beilstein, F., and A. Kurbatow, Caucasian petroleum, 159, 1020.
 — — hydrocarbons from American petroleum, 159.
 — — oxidation of α - and β -dinitronaphthalene by nitric acid, 435.
 Békétóff, combination of sodium oxide with carbonic anhydride and action of sodium on mercuric oxide, 348.
 Beletzky, decomposition of phosphorite by peat, 457.
 Bellati, M., and R. Romanese, thermic properties of some double iodides, 217.
 Belohoubek, analysis of Bohemian tea, 131.
 Belohoubek, analyses of commercial articles in Austria, 941.
 Bénard and J. Girardin, estimation of gluten in flour, 1177.
 Bender, G., action of ethyl chlorocarbonate on phenols, 48.
 Benedikt, R., and A. v. Hübl, dinitro- and trinitro-resorcinol, 1132.
 Benedikt. See also Weselsky.
 Benker. See Lasne.
 Benoist. See Miquel.
 Berger, F., action of acetamide on phenyl cyanamide, 810.
 Bergmann, A., Tiemann's process for the manufacture of butter and cheese, 952.
 Bernheimer, O., organic nitroprussides, 883.
 — products from the roasting of coffee, 287.
 Bernthsen, A., composition of sodium hyposulphite, 508, 976.
 — use of sodium hyposulphite, Na_2SO_3 , in the estimation of copper, of indigo, and of oxygen dissolved in water, 310.
 Bernthsen, A., and A. Drews, titration of hyposulphite with indigo carmine, 310.
 Berthelot, action of the hydracids on salts containing the same haloïd elements, 868.
 — atacamite, 7.
 — chloral alcoholate, 675.
 — contributions to the history of the ethers, 8.
 — cuprous chloride, 6.
 — ethyl peroxide, 709.
 — ethylene chlorhydrin, 887.
 — glycollic ether and ethylene oxides, 967.
 — heat of formation of sulphur oxides, 673.
 — heat of vaporisation of sulphuric anhydride, 876.
 — heats of formation of the oxides of nitrogen and of sulphur, 6.
 — hydrochlorides of metallic chlorides and the reduction of chlorides by hydrogen, 877.
 — magnetic oxide of iron, 219.
 — part played by time in the formation of salts, 344.
 — preparation of chlorine, 22.
 — reciprocal displacements of the halogen elements, 5, 342.
 — reciprocal displacement of the hydracids, 869.
 — remarks on the properties of vapours of chlorinated organic compounds, 470.

- Berthelot, solution of chlorine in water, 784.
 — specific heat and heat of dilution of perchloric acid, 1092.
 — spontaneous oxidation of mercury and other metals, 791.
 — stability of hydrogen peroxide, 16.
 — the saccharoses, 567.
 — thermal formation of pyrogenic hydrocarbons, 343.
 — thermochemistry, 8.
 — thermochemistry of certain haloïd salts, 219.
 Berthelot and J. Ogier, heat of formation of diallyl chlorinated compounds and aldehyde, 674.
 — — heat of formation of various carbon compounds, 870.
 — — researches on isomerism: benzene and dipropargyl, 719.
 Berthelot and Vieille, diazobenzene nitrate, 809.
 — — heat of formation of potassium perchlorate, 1093.
 — — study of the explosive properties of mercury fulminate, 779.
 Bertrand, A., combination of titanium tetrachloride and benzoic chloride, 273.
 — combination of titanium tetrachloride with ethyl ether, 240.
 — combination of titanium tetrachloride with phosphorus trichloride, 347.
 — reduction of ethyl nitrate by alcohol, 242.
 Bertrand, A., and E. Finot, action of antimony pentachloride on carbon bisulphide, 238.
 Bertrand, E., andalusite from Brazil, 25.
 Bertrand, E., and A. E. Nordenskiöld, thaumasite and melanophlogite, 1000.
 Bertrand. See also Richard.
 Berwerth, F., nephrite and bowenite from New Zealand, 377.
 Bettel, W., determination of basic cinder and oxides in manufactured iron, 648.
 Bevan, E. T., and C. F. Cross, bast fibres, 111, 1121.
 Beyer, B., some derivatives of isophthalic acid, 96.
 Biefel, R., and T. Poleck, poisoning by choke-damp and coal-gas, 853.
 Bing, J., occurrence and estimation of nitrates in some vegetable substances, 122.
 Birnbaum, K., analyses of gluten bread, 67.
 Birnbaum, K., and G. Lurie, action of resorcinol on urea, 95.
 Birner, effect of the moisture in soils on the yield of potatoes, 1066.
 Birner and Brimmer, researches on the changes occurring in stable manure when kept, 937.
 Bischoff, A., and M. Guthzeit, β -methylethynyltricarboxylic acid, 579.
 Bischoff, C., homologues of aceto-propionic acid, 412.
 Bischoff, C. A., synthesis of tri- and tetra-basic fatty acids, 155.
 Bizzarri. See Campani.
 Blake, J., relation between the molecular properties of inorganic compounds and their action on living animal organisms, 629.
 Blake, W. P., occurrence of cinnabar in California and Nevada, 689.
 Blankenhorn. See Gamgee.
 Bleunard, A., legumin, 449.
 — products of the decomposition of protein compounds, 1047.
 Blomstrand, C. W., arctolite, a mineral from Spitzbergen, 1006.
 Blondlot, R., electric conductivity of heated gases, 671.
 Blyth, A. W., estimation of quinine, 1176.
 Bock. See Claus.
 Bodaszewsky, L. J., smoke and vapour under the microscope, 505.
 Bodenbender, H., and others, analyses of beet-molasses, 1089.
 Böckmann, F., celluloid, 481.
 Bödeker, K., lycopodine, 1158.
 Böhm, J., pressure in plant stems, 60.
 Böhringer. See Först.
 Bösler, cuminoïn and anisoïn, 421.
 Böttinger, C., behaviour of glyoxylic acid with potash, 155.
 — constitution of aniluvitonic acid, 278.
 — constitution of uvitonic acid, 173.
 — decomposition of mesoxalic acid, 415.
 — dimethyl α -oxyuvitate, 278.
 — ethyl pyroracemate, 418.
 — formation of pyrrolone, 614.
 — formation of uvic (pyrotritartaric) acid, 155.
 — introduction of aromatic hydrocarbons into ketonic and aldehydic acids, 1035.
 — oxyethylidenesuccinic acid, 254.
 — preparation of α -hydroxyuvitic acid, 172.
 — pyroracemic acid compounds, 1032.
 — sugar from the tannin of the oak bark, 1021.
 — synthesis of quinoline, 182.
 — synthetic picolinemonocarboxylic and pyridenecarboxylic acids, 612.

- Böttinger, C., synthetical pyridene-tricarboxylic acid, 181.
 ——— tartronic acid, 714.
 Bogomoletz, action of zinc-methyl on chloroacetic chloride, 401.
 Boissaudran, L. de, anhydrous gallium chlorides, 1103.
 Bolton, H. C., action of organic acids on minerals, 62, 642.
 Boner. See Meyer.
 Bong, G., residue from the manufacture of paraffin oil from schists, 208.
 Bonnier. See Tieghem.
 Bordet, L., cork tar, 1040.
 Bornträger, A., detection of salicylic acid in urine, 472.
 ——— urine after administration of quinine and morphine, 192.
 Bornträger. See also Kulz.
 Borodin, A., action of nitric acid on deoxybenzoin, 813.
 v. Borries, C., composition of milk from the same cow on consecutive days, 762.
 Borsilowsky, J., azo-derivatives of toluene, 432.
 Bottler. See Claus.
 Bottomley, J. T., on the thermal conductivity of water, 966.
 Bouchardat, G., action of sulphuric acid on bromamylene, 1114.
 Bouchardat. See also Richet.
 Boucheron, M., abnormal presence of uric acid in the saliva, gastric juice, and other secretions, 1161.
 Boungué, electrolysis of formic and mellic acids, 798.
 Bourgeois, L., preparation of crystallised chromates, 352.
 Bourgoin, E., action of bromine on malonic acid, 155.
 Boussingault, J., dissociation of nitric acid by vegetation, 836.
 ——— rapid alcoholic fermentation, 652.
 ——— saccharine matters in the fruit of the coffee-plant, 127.
 ——— the hot spring of the littoral chain of Venezuela, 563.
 Boutmy. See Brouardel.
 Bouty, E., changes of volume accompanying electrolytic deposition of a metal, 671.
 ——— measure of the thermoelectric electromotive forces developed by the contact of a metal and a liquid, 336.
 Bowman, W. J., *Aspidium rigidum*, 1152.
 Braga, J. F., hair-dyes, 67.
 Braham, P., analysis of a crystalline mercury salt, 355.
 ——— silver sulphate, 354.
 Brame, C., use of baryta to obtain metallic arsenic from arsenious oxide and arsenic sulphides, 467.
 Braun, J., nickel speiss, 228.
 Brauner, B., atomic weight of glucinum, 224.
 Brauner, B., and J. I. Watts, specific volumes of oxides, 219.
 Bredt, J., constitution of lactones, 34.
 Breymann, E., crushed seeds as fodder, 837.
 Brezina, A., autunite, 531.
 ——— herregrundite, a new basic copper sulphate, 524.
 Briem, H., influence of heat on the growth of beets and potatoes, 633.
 ——— influence of light on the growth of beet, 930.
 Brier, C., and L. Jehle, experiments with various kinds of beet, 60.
 Brimmer. See Birner.
 Broch, O. J., H. St. Claire Deville, and J. Stas, measure made of a 10 per cent. iridium-platinum alloy, 680.
 Brögger, W. C., two furnace products, 353.
 Brouardel, P., and E. Boutmy, test to distinguish ptomaines from vegetable alkaloids, 749.
 Brown, H. T., and J. Heron, hydrolytic action of the pancreas and small intestine, 114.
 Brown, T. M., reduction of iron-ores by powdered zinc, 1170.
 Brückner, A., oxidation of nitrogenous methylated benzene derivatives, 93.
 Bruère, conversion of terebenthene into cymene, 39.
 Brühl, J. W., chemical constitution of organic compounds in relation to their refractive power and density, 489.
 ——— relations between the physical properties of carbon compounds and their chemical constitution, 15.
 Brunck, H., and C. Graebe, action of soda on cast-iron, 126.
 Brunner. See Senhofer.
 Brunton, T. L., and T. Cash, action of ammonia and its salts, and of hydrocyanic acid, on muscle and nerve, 1058.
 Brush, G. J., and W. J. Comstock, American sulpho-selenides of mercury, 229, 361.
 Brush, G. J., and E. S. Dana, new mineral species from Fairfield, Connecticut, 529.
 ——— relation between childrenite and eosphorite, 365.
 Buchner, H., artificial generation of spleen fungus, 59.

- Buchner, M., boghead coal from Resiutta, 688.
 Bücking, H., freislebenite from Hien-delaencina, Spain, 24.
 Buisine. See Du villier.
 Bunte, H., analyses of furnace gases, 939.
 Bureker, E., synthesis of benzoyl propionic acid, 273.
 Burg, O., picene, a new hydrocarbon from peat-tar, 179.
 Buri, E., analysis of the mineral water of Niederbronn in Unter-Elsass, 80.
 Burney. See Remsen.
 Byasson, H., transformation of chloral into meta-chloral, 248.

C.

- Cahours, A., and A. Étard, action of selenium on nicotine, 825.
 ——— nicotine, 288.
 Cailletet, L., and P. Hautefeuille, changes of state near the critical temperature, 677.
 ——— densities of liquid oxygen, hydrogen, and nitrogen in presence of inert liquids, 874.
 ——— liquefaction of gaseous mixtures, 676.
 Caldwell, G. C., milk-testing with the lactobutylrometer, 657.
 Camerer, researches on tissue change in children, 189.
 Cameron, C. A., analysis of milk, 1176.
 ——— sewage in oysters, 953.
 Cameron, C. A., and E. W. Davy, new selenium compounds, 1099.
 Campani, G., and D. Bizzarri, tartaric acid produced by the oxidation of glycerol with potassium permanganate, 256.
 Campbell, J. L., dufrenite from Rock-bridge Co., Virginia, 1111.
 Cannizzaro, S., and G. Carnelutti, action of phosphorus pentachloride on santonic acid, 286.
 ——— derivatives of santonin, 53.
 ——— the two isomerides of santonin called metasantonin, 285.
 Canzoneri, F., oxidation of the methyl ether of paraxylol, 268.
 Canzoneri. See also Paternò.
 Carl, F., isethionic acid, 581.
